

IMPROVE COURSE ENGAGEMENT FOR BETTER STUDENT OUTCOMES.

Image credit: Haruneko, Shutterstock

Whether in-person or virtual, strong connections improve student outcomes.

iClicker can help instructors:

- Create engaging, connected experiences
- Work seamlessly with any webconference or presentation software
- Institute multi-modal teaching using different question types for deeper learning: multiple select, target, open response and numeric

Want to engage students for better course outcomes? iClicker can help.

CREATED FOR STUDENTS, **BY EDUCATORS**

For more than a decade, iClicker has delivered a simple, pedagogically-sound way to foster active learning. Here's why iClicker is the most-widely used student engagement system in higher education and the perfect complement to your Skyfactor assessments.

Set up in just minutes.

Get started in 5 minutes and work with any existing content. No need to import or author new questions within the technology. Just create a course and get started.

Flexible student options.

Students can use mobile devices, laptops, or an iClicker remote. One purchase. All access.

Efficiently facilitate active learning.

Ask polling questions on the fly. Complete quizzes and grade in minutes. A variety of question-types are available including target questions and short answer.

Instant study guides.

Students leave class a mobile study guide displaying every iClicker question asked.
